

Connecting to eduroam on a Windows laptop

You will first need to configure your laptop in order to connect to eduroam. To do this you will need to download and install a configuration tool. This can be done by connecting to the StrathWifiSetup network available in the Library and Student Residences. The following instructions show the steps for doing so on a Windows laptop. Different versions of Windows may vary slightly in layout but the process will remain the same. You will only need to configure your device once and thereafter it will automatically connect to eduroam.

eduroam						
Welcome to StrathWiFiSetup						
Eduroam is the wireless network available throughout the University for staff and students, and is also present in academic institutions and other places around	the work	L.				
Quicklinks: Android IOS [Viindows] MacOSX Linux Chromebook						
Connecting securely and reliably to educem requires quite complex configuration to set up the wireless profile. StrathWF/Betup provides access to some tools perform this work for you on in these of devices. These notes are intended for Strathcybe users setting up their devices, if you are a visitor to Strathcybe with from another reliably, then in which will when connecting to the devicem elevoids at Strathcybe.	and guid h a work	ance whi ng eduro	ch will am prof	le		
While connected to StrathWIFiSetup, you can also update your device via Windows Updates or the Apple Software Update if needed, and for Android install the	necessa	ry suppo	ting app	a.		
If you are using a mobile device with a data plan, you may find it more straightforward to go directly to the educoam CAT site (https://cat.eduroam.org/?kdp=140) and follow the instructions there. You should "Forget" the Straightforketup wireless network in that case.						
The instructions below are necessarily brief, the University has published detailed step-by-step guides for the configuration of various types of devices here.						
If you already have an edurcam wireless profile on your device that does not appear to work, you are advised to delete it before starting again.						
Android						
To set up the eduroam wireless profile on your Android device please follow these steps:						
1 For Android 11 and allowin, install the <u>adjustment</u> age from the Coccept Playstone 2 For Android 10 and below, install the <u>adjustment</u> CAI age from the Coccept Playstone						

4. The StrathWifiSetup webpage may automatically open.

If it doesn't, open a browser and enter wifisetup.strath.ac.uk into the address bar.

Click on Windows.

Microsoft Windows
To set up the eduroam wireless profile on your Microsoft Windows device please follow these steps:
 Run In <u>educant wreass continensation from educant origin</u> Once the source memory promote resource for your vortes to "Forget" the StrathwillSetup network so you do not continue to connect to it.
Note that you can also use the getedurcam app to set up eduroam or vindows devices, however this has not been tested.
Apple MacOSX
To set up the eduroam wireless profile on your Apple Mac device please follow they steps using the Safari browser (other browsers are not likely to work):
 Run the educraem wireless profile installer from educraem org Once the educraem wireless profile is installed, tell your device to "Forget" the Strathed/Setup network so you do not continue to connect to it.
Linux
