## **EMPRESS Workshop**

A one-day conference on enhanced temperature measurement techniques for improved process control held on 22 March 2017

Advanced Forming Research Centre, 85 Inchinnan Drive, Inchinnan, PA4 9LJ, United Kingdom <u>www.npl.co.uk/events</u>

10.50Overview of WP2: Zero-drift contact temperature sensors to 1350 °CClaire Elliott, NPL11.00Coffee break11.30Introduction to a new low drift base metal thermocouple mineral insulated cable technology quartz tubes and sapphire fibreMichele Scervini, Cambridge University & Trevor Ford, CCPI Europe Ltd11.50Optical based contact thermometer using SiC, quartz tubes and sapphire fibreSigurd Simonsen, Elkem12.10High-temperature measurement in industrial practiceJurgen Blüm, MUT13.30Overview of WP3: Traceable surface temperature measurement with contact sensorsLucia Rosso, INRiM13.40Thermocouples in industrial environments combustor cooling conceptsMark Thomas, BAE Systems14.00Surface thermometry in low TRL testing of combustor cooling conceptsClare Bonham, Loughborough University14.40Tea break and networking15.10Overview of WP4: Traceable combustion temperature measurementGavin Sutton, NPL15.20Laser techniques for flame and combustion thermometryPaul Ewart, Oxford University15.40Temperature measurements in turbulent flames using Raman spectroscopyWolfgang Meier, DLR	Wednesday 22 March 2017				
10.50Overview of WP2: Zero-drift contact temperature sensors to 1350 °CClaire Elliott, NPL11.00Coffee break11.30Introduction to a new low drift base metal thermocouple mineral insulated cable technology quartz tubes and sapphire fibreMichele Scervini, Cambridge University & Trevor Ford, CCPI Europe Ltd11.50Optical based contact thermometer using SiC, quartz tubes and sapphire fibreSigurd Simonsen, Elkem12.10High-temperature measurement in industrial practiceJurgen Blüm, MUT13.30Overview of WP3: Traceable surface temperature measurement with contact sensorsLucia Rosso, INRiM13.40Thermocouples in industrial environments combustor cooling conceptsMark Thomas, BAE Systems14.00Surface thermometry in low TRL testing of combustor cooling conceptsClare Bonham, Loughborough University14.40Tea break and networking15.10Overview of WP4: Traceable combustion temperature measurementGavin Sutton, NPL15.20Laser techniques for flame and combustion thermometryPaul Ewart, Oxford University15.40Temperature measurements in turbulent flames using Raman spectroscopyWolfgang Meier, DLR	9.00	-		=	
10.50Overview of WP2: Zero-drift contact temperature sensors to 1350 °CClaire Elliott, NPL11.00Coffee break11.30Introduction to a new low drift base metal thermocouple mineral insulated cable technology quartz tubes and sapphire fibreMichele Scervini, Cambridge University & Trevor Ford, CCPI Europe Ltd11.50Optical based contact thermometer using SiC, quartz tubes and sapphire fibreSigurd Simonsen, Elkem12.10High-temperature measurement in industrial practiceJurgen Blüm, MUT13.30Overview of WP3: Traceable surface temperature measurement with contact sensorsLucia Rosso, INRiM13.40Thermocouples in industrial environments combustor cooling conceptsMark Thomas, BAE Systems14.00Surface thermometry in low TRL testing of combustor cooling conceptsClare Bonham, Loughborough University14.20Overview of WP4: Traceable combustion temperature measurementGavin Sutton, NPL15.20Laser techniques for flame and combustion thermometryPaul Ewart, Oxford University15.40Temperature measurements in turbulent flames using Raman spectroscopyWolfgang Meier, DLR	9.30	Welcome to the AFRC	David Jones, AFRC	Introduction & keynote	
10.50Overview of WP2: Zero-drift contact temperature sensors to 1350 °CClaire Elliott, NPL11.00Coffee break11.30Introduction to a new low drift base metal thermocouple mineral insulated cable technology quartz tubes and sapphire fibreMichele Scervini, Cambridge University & Trevor Ford, CCPI Europe Ltd11.50Optical based contact thermometer using SiC, quartz tubes and sapphire fibreSigurd Simonsen, Elkem12.10High-temperature measurement in industrial practiceJurgen Blüm, MUT13.30Overview of WP3: Traceable surface temperature measurement with contact sensorsLucia Rosso, INRiM13.40Thermocouples in industrial environments combustor cooling conceptsMark Thomas, BAE Systems14.00Surface thermometry in low TRL testing of combustor cooling conceptsClare Bonham, Loughborough University14.20Overview of WP4: Traceable combustion temperature measurementGavin Sutton, NPL15.20Laser techniques for flame and combustion thermometryPaul Ewart, Oxford University15.40Temperature measurements in turbulent flames using Raman spectroscopyWolfgang Meier, DLR	9.35	Welcome and introduction	Graham Machin, NPL		
10.50Overview of WP2: Zero-drift contact temperature sensors to 1350 °CClaire Elliott, NPL11.00Coffee break11.30Introduction to a new low drift base metal thermocouple mineral insulated cable technology quartz tubes and sapphire fibreMichele Scervini, Cambridge University & Trevor Ford, CCPI Europe Ltd11.50Optical based contact thermometer using SiC, quartz tubes and sapphire fibreSigurd Simonsen, Elkem12.10High-temperature measurement in industrial practiceJurgen Blüm, MUT13.30Overview of WP3: Traceable surface temperature measurement with contact sensorsLucia Rosso, INRiM13.40Thermocouples in industrial environments combustor cooling conceptsMark Thomas, BAE Systems14.00Surface thermometry in low TRL testing of combustor cooling conceptsClare Bonham, Loughborough University14.20Overview of WP4: Traceable combustion temperature measurementGavin Sutton, NPL15.20Laser techniques for flame and combustion thermometryPaul Ewart, Oxford University15.40Temperature measurements in turbulent flames using Raman spectroscopyWolfgang Meier, DLR	9.40	Overview of the EMPRESS project	Jonathan Pearce, NPL	ctio	
10.50Overview of WP2: Zero-drift contact temperature sensors to 1350 °CClaire Elliott, NPL11.00Coffee break11.30Introduction to a new low drift base metal thermocouple mineral insulated cable technology quartz tubes and sapphire fibreMichele Scervini, Cambridge University & Trevor Ford, CCPI Europe Ltd11.50Optical based contact thermometer using SiC, quartz tubes and sapphire fibreSigurd Simonsen, Elkem12.10High-temperature measurement in industrial practiceJurgen Blüm, MUT13.30Overview of WP3: Traceable surface temperature measurement with contact sensorsLucia Rosso, INRiM13.40Thermocouples in industrial environments combustor cooling conceptsMark Thomas, BAE Systems14.00Surface thermometry in low TRL testing of combustor cooling conceptsClare Bonham, Loughborough University14.20Overview of WP4: Traceable combustion temperature measurementGavin Sutton, NPL15.20Laser techniques for flame and combustion thermometryPaul Ewart, Oxford University15.40Temperature measurements in turbulent flames using Raman spectroscopyWolfgang Meier, DLR	10.00	Keynote: Temperature measurement for better	Pete Loftus, Rolls-Royce	n &
