GA COURSES

We look forward to welcoming you to our Graduate Apprenticeships Recruitment Showcase at the University of Strathclyde

We have been successfully delivering high quality graduate apprenticeships since 2017 and offer six courses across a range of disciplines. We are hosting this event to profile the many fantastic and diverse opportunities available with our employer partners, many who have been with us since we began our Graduate Apprenticeship journey.

There can be at times a misconception around the word “apprenticeship” – that it is a lower level qualification, in comparison to the traditional university route. This cannot be further from the truth. Our GAs are full time, funded undergraduate degree courses and our apprentices have all the same benefits as our students.

Our GAs are full time, permanent job roles whilst the employer supports apprentices to study towards their degree. Our one day a month on campus minimises time out of the business and our apprentices are fully supported throughout their studies by a dedicated learning advisor.

Apprentices bring their learning from university straight back into their job role, developing their skills in that industry.

We hope you find the evening informative and wish you the best of luck for the future.

Please remember to use our hashtag, **#StrathGAShowcase** and tag us on LinkedIn.
