# WELCOME FROM THE AGCAS EXECUTIVE DIRECTOR

**Elaine Boyes**  
AGCAS Executive Director

I am delighted to welcome you to the 33rd Scottish Graduate Fair. In this room are representatives from many organisations and sectors; this is a unique chance for you to have your questions answered by people on the inside. There will be opportunities for you here regardless of your academic discipline.

You have studied through a turbulent time yet are emerging into a more optimistic and flexible environment. Your university experience may have been unusual, but you bring skills, knowledge and experience which employers here are looking for. You have gained a lot from your time at university, be confident and know your worth.

Before talking with employers taking part in the fair today, you should aim to spend some time reading through the information provided to help you:

- decide which employers interest you most
- think about the questions you'd like to ask them
- reflect on your key strengths and skills and what you have to offer a potential employer
- consider what you want each employer to know about you.

This preparation is really important to help you approach employers with confidence and ensure that you get the most out of your time at the fair.

You will also have the opportunity today to access careers information and advice from university careers services. Qualified careers professionals are on-hand to provide advice and help you consider your options. They can also tell you more about the huge range of careers support available at your own institution.

AGCAS, the Association of Graduate Careers Advisory Services, is the expert membership organisation for higher education student career development and graduate employment professionals. Through our members, we support the best possible career outcomes from higher education of individuals, institutions, society and the economy.

As well as organising events such as this fair today, AGCAS researches and writes a wealth of careers information material, including 'What can I do with my degree?' and job profiles to help you plan your future. You can access it all online via [www.prospects.ac.uk](http://www.prospects.ac.uk) and on our own website ([www.agcas.org.uk](http://www.agcas.org.uk)).

I hope you enjoy today's fair and that it helps you on your journey towards a rewarding career. Good luck for the future!

# PREPARE FOR THE FAIR

## Before the fair:

- View Exhibitors: Check the exhibitor list and Guide and make note of the exhibitors whom you wish to visit.
- Research exhibitors: Find out what this employer does, their products, their graduate opportunities any recent announcements. Use websites to check the nature of their vacancies and their entry requirements. Think of sensible questions to ask.
- Be Mindful: Think about what you are going to wear. Formal/ smart casual is recommended
- Starting Conversations: Think about how you will introduce yourself confidently to exhibitors. Avoid generic questions like “what do you do?”
- Practice "Promoting yourself": Think about what sets you apart from the competition. What are your key strengths and skills? What are the key things you would like others to know about you? Provide examples.
- CV's: Take CVs if you wish, but it is not vital. Some recruiters may not take them as they require on-line applications. If you do take a CV - be prepared, make sure there are no typos and that all your details are clear and accurate.
- Take notes: Of exhibitor's answers or their names in case you need to follow up later.

## On the Day:

- Talk about yourself: - Be positive! - Talk about why you are interested in the company and what you can bring to it.
- When asking questions: - Be enthusiastic - Take notes so you don't forget what the exhibitors are telling you

## After the Fair:

- Review your notes
- Follow up on any contacts you've made
- Confirm any dates discussed (e.g. closing dates, company events)
- Connect with any contacts you made on LinkedIn
- Visit the Careers Service at your University for further help

# MAKING THE MOST OF THE FAIR

## Students of earlier years

Looking for work experience? Many exhibitors offer internships, placements or Insight Days, including increasing numbers targeting first and second years. They are really keen to attract early years students to apply for them.

Taking up these opportunities enhance your CV, gives you an insight into an organisation and helps you decide if you want to join them after graduation. Competition for places is strong so:

- Check out the exhibitors' websites and the opportunities on your Careers Service website
- Know what you want and what you can offer
- Introduce yourself positively and ask sensible questions
- Attend employer presentations, networking events and other campus events

## Finalists/Postgraduates

The Fair is a great opportunity to plan ahead in your job search. Use the event to:

- Find out about vacancies on offer starting next year
- Learn how many vacancies do NOT require specific degree disciplines but are open to all
- Talk directly to employers to get an insight into their organisation and selection criteria, discovering more than you can get from their website
- Get advice from the experts on how to improve your jobs search techniques.

At this early stage in the year, employers will not be interviewing you for their vacancies (that comes later in the selection procedure), but research done now will save you time and effort later. It also allows you to refer to information picked up at the Fair in any future interview, demonstrating you have properly researched the company.

Your Careers Service is in regular contact with a wide range of employers. Check with them for other first semester activities which they might be organising to help you plan ahead:

- Attend employer presentations on campus
- Go to relevant careers information events/fairs
- Access the thousands

# MAKING THE MOST OF THE FAIR (continued)

## Graduates

To get the most out of the Fair, you need to be organised and well prepared. Be realistic. No matter how brilliant you are, no-one is going to offer you a job on the spot. Organisations use the Fair to raise their profile and identify suitable candidates for their vacancies. Those that impress may receive invitations to attend follow up recruitment events with individual employers. To make the right impression, you should:

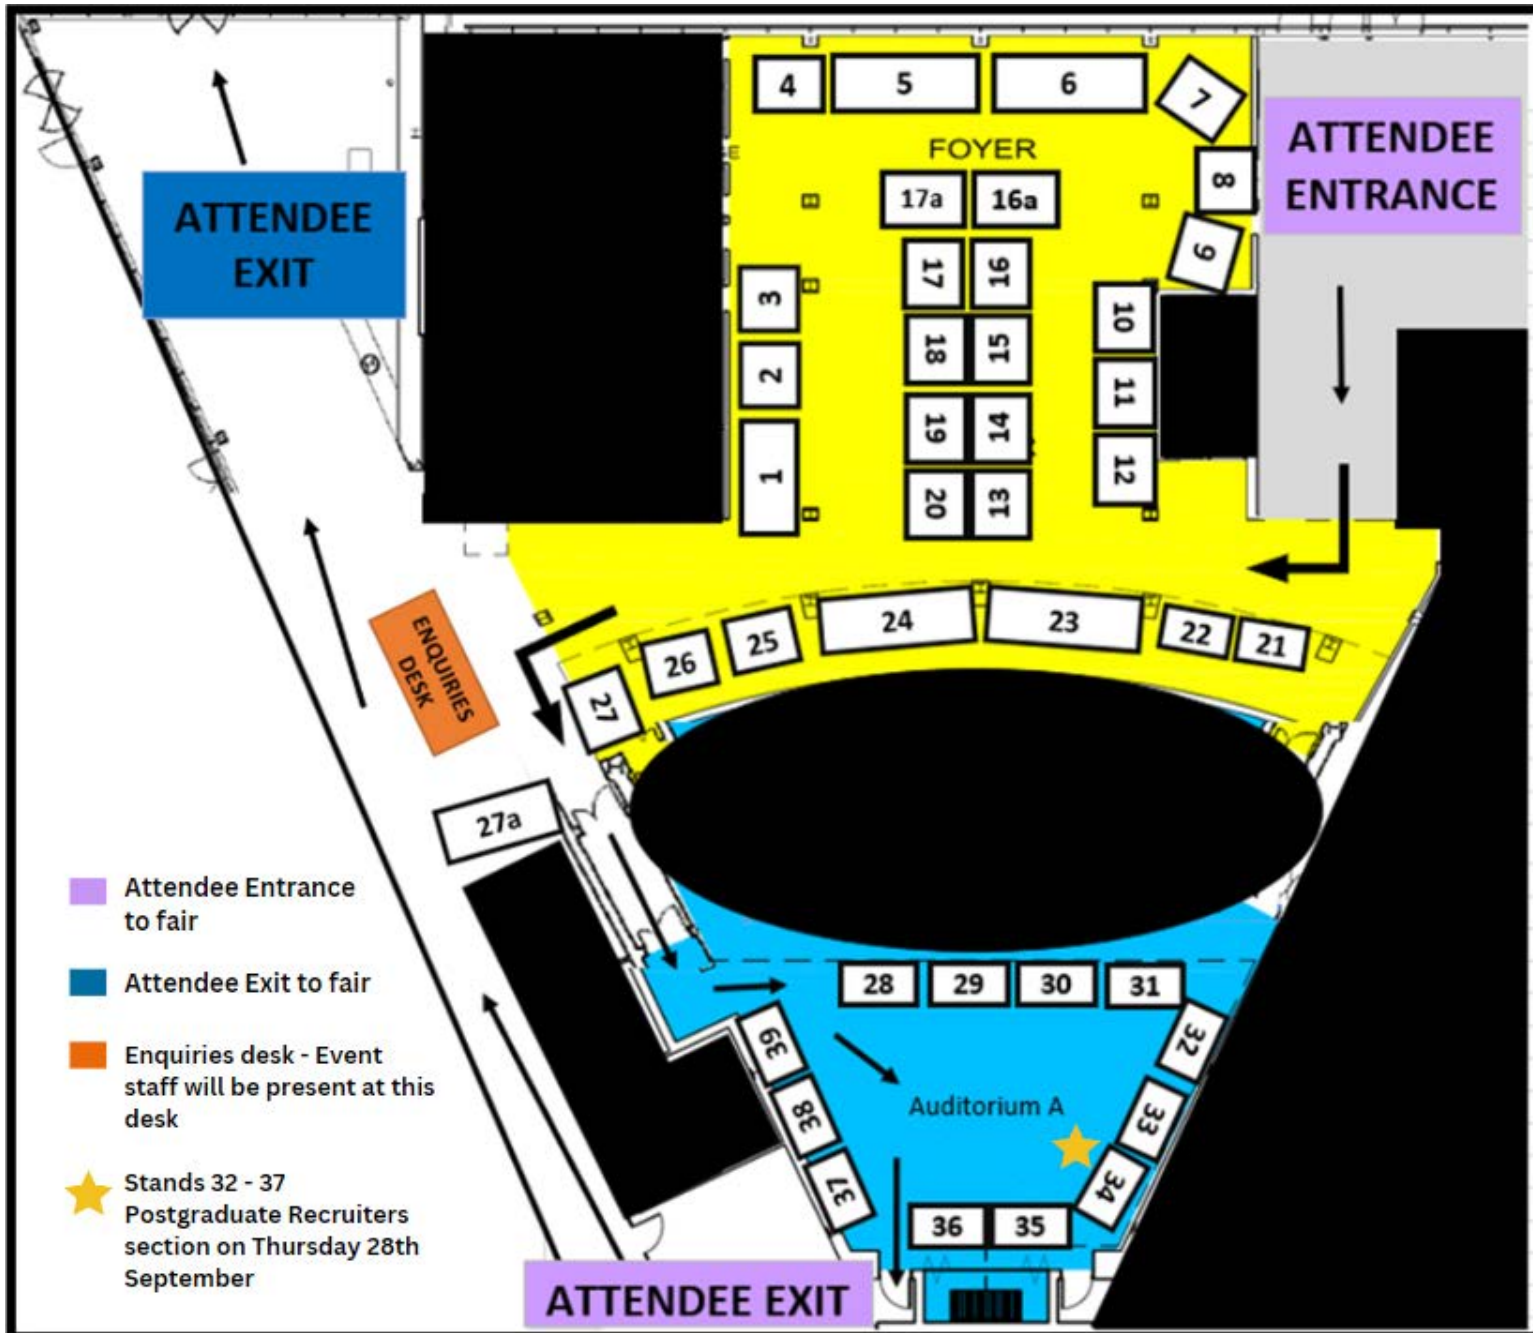

- Be clear what type of work you are looking for and why you would be good at it
- Use this brochure to find out which employers have relevant vacancies
- Research the employers that interest you BEFORE attending the Fair, so you can impress them with your awareness. Use your University Careers Service website, employer websites and brochures
- Ask questions about information you can't find on their website.

The Fair will be busy so you will only have a short time to make an impact. Asking vague questions or being unclear about your career interests will not entice employers to hire you.

You can take copies of your CV if it is impressive, to give to employers, but be aware that most recruitment is online. So, concentrate on impressing exhibitors with your knowledge of their company and your enthusiasm

# FLOORPLAN

THIS FAIR IS HELD ON GROUND LEVEL, YOU CAN ACCESS OUR FAIR FROM STREET LEVEL.

NO STAIRS OR LIFTS WILL BE NEEDED TO ACCESS THIS FAIR.

# NOTES FOR INTERNATIONAL JOB SEEKERS

It helps to know what to expect at a UK graduate recruitment fair as it may be different from fairs overseas. **The purpose of these events in the UK is for employers to raise awareness of graduate opportunities. They are not “hiring fairs” and you will not be interviewed for jobs on the day.** Employers are happy to answer your questions, but they expect you to submit an application, which may include a CV and cover letter, at a later date and to go through their selection process. This could involve a number of stages and might include interviews, psychometric tests and an assessment centre. Your Careers Service can help you prepare for all these stages of the selection process and, in the meantime, you should do everything you can to develop your verbal and written English language skills, and make sure your CV is appropriate for the UK graduate market.

We advise all jobseekers to ask questions that show a genuine interest in the company and a knowledge of the jobs on offer. Make sure you have read the information on the company website and check that you meet their essential criteria.

Since 1st July 2021, applications are open for the Graduate Route Visa which allows international graduates to stay in the UK for up to two years (or three if you have a PhD) to work or look for work. There is more information about the Graduate Route Visa on this website <https://www.ukcisa.org.uk/Information--Advice/Working/Working-after-studies>

We advise you to be well informed about the Graduate Route Visa so you can reassure employers that it is now much easier for them to hire international graduates. We also encourage you to be confident in describing the unique skillset you offer as an international graduate - you can use examples from all areas of your life, so don't worry if you lack sector specific work experience. It is also important to research the company, and role, first so you emphasise skills that are relevant to their business.

A guide\* for employers on recruiting international graduate's highlights that:

- employers with a diverse workforce benefit from increased innovation and creativity and enhanced brand appeal
- international graduates can help you fill skills gaps in areas such as engineering, IT, and biological science
- grow your exports by harnessing international graduates' home country knowledge, and languages such as Mandarin and Arabic

\* *Recruiting International Graduates: A Guide for Employers, Hiring options under the Graduate and Skilled Worker routes. International Student Employability Group, June 2021.*
