

Connecting to eduroam on a Chromebook laptop

You will first need to configure your laptop in order to connect to eduroam. To do this you will need to download and install a configuration tool. This can be done by connecting to the StrathWifiSetup network available in the Library and Student Residences. The following instructions show the steps for doing so on a Chromebook laptop. Different versions of Chrome OS may vary slightly in layout but the process will remain the same. You will only need to configure your device once and thereafter it will automatically connect to eduroam.

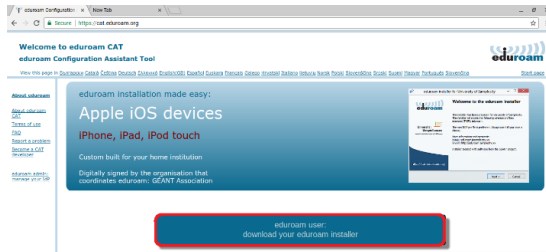

4. Once you are connected to the network, launch a browser.

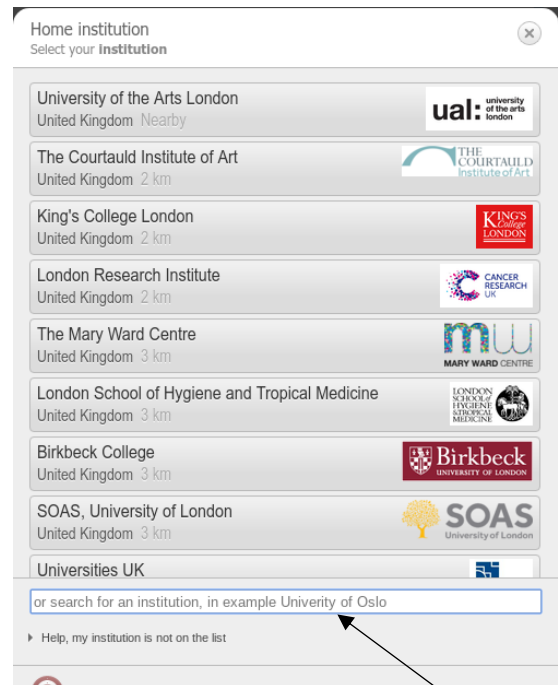

5. You should be automatically redirected to the StrathWifiSetup homepage where you can click on any link that says Install the eduroam installer from eduroam.org. Alternatively, you can just enter cat.eduroam.org directly into the address bar.

10. In the drop-down box that appears, click Continue.

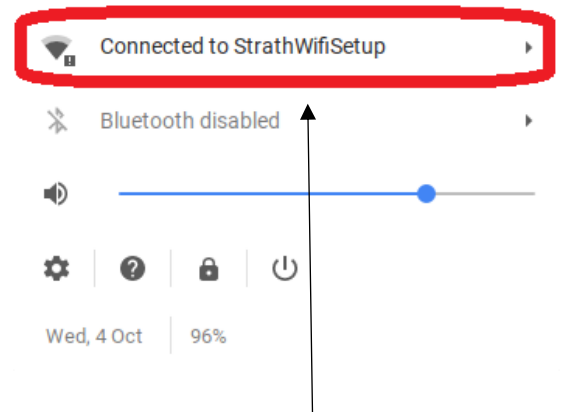

11. Once your eduroam installer is completely downloaded, open a browser and go to chrome://net-internals/#chromeos.

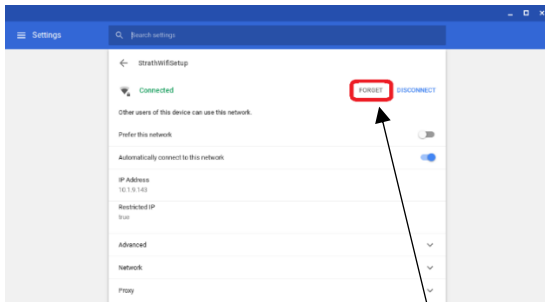

12. Click on Choose File and select the eduroam installer file. Do not worry if after you have uploaded the file, the page still says Choose File, this is normal.

13. Click on the Wifi icon.

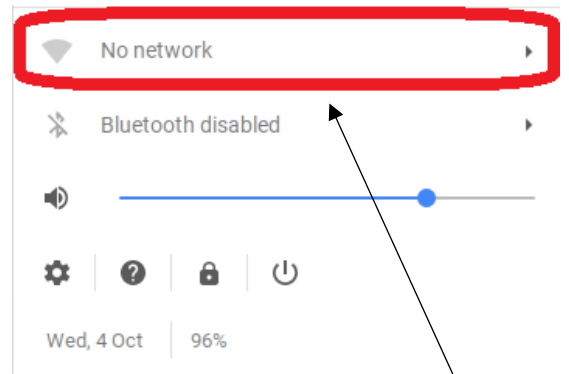

14. In the pop-up menu that appears, click on Connected to StrathWifiSetup.

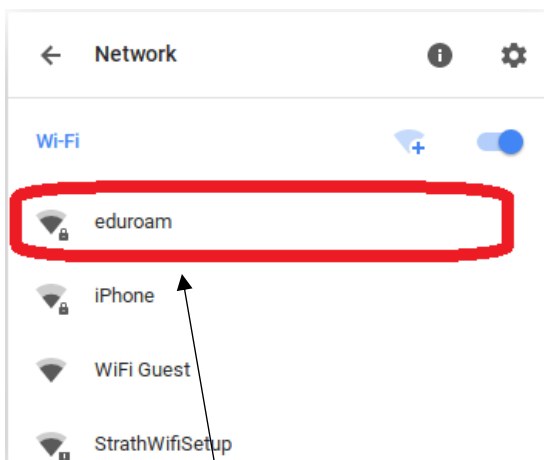

15. In the Settings folder, click on Forget, then close the folder.

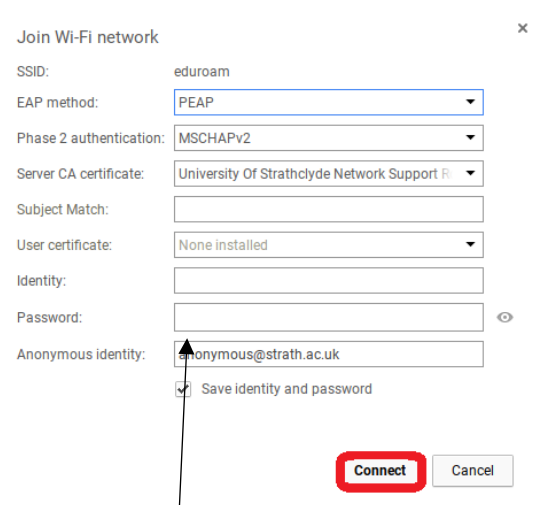

16. Click on the Wifi icon.

17. In the pop-up menu that appears, click on No network.

18. Click on eduroam.

19. In the Join Wi-Fi network box that appears, where it says Identity, enter your username followed by @strath.ac.uk. For example, pkb09111@strath.ac.uk.

Where it says Password, enter your password.

Click on Connect.

You will now be connected to eduroam.
