

Connecting to eduroam on a Chromebook laptop

You will first need to configure your laptop in order to connect to eduroam. To do this you will need to download and install a configuration tool. This can be done by connecting to the StrathWifiSetup network available in the Library and Student Residences. The following instructions show the steps for doing so on a Chromebook laptop. Different versions of Chrome OS may vary slightly in layout but the process will remain the same. You will only need to configure your device once and thereafter it will automatically connect to eduroam.

the Wifi Network button.

icon.

4. Open a browser, and go to

5. Click on Click here to download your

cat.eduroam.org. Scroll down.

eduroam installer.
