

Set up VPN on Android

You can download FortiClient VPN from the Google Play Store. The following instructions show the steps setting up VPN on Android devices. Different versions of Android may vary slightly in layout but the process will remain the same.

1. Find FortiClient VPN in the Google Play Store, then select Install.

2. Once the installation is complete, select Open.

Privacy Policy Highlights

FortiClient DOES NOT collect and send any user specific personal information like username, photos or email address to Fortinet

FortiClient may collect anonymous usage information and share with Fortinet for the purpose of improving usability and functionality

FortiClient does not monitor end user VPN traffic

FortiClient Webfilter feature, if enabled, submits website urls to Fortinet servers for category rating.

By selecting "I accept" below, you agree to the FortiClient <[Terms and Conditions](#)> and <[Privacy Policy](#)>

Welcome to FortiClient VPN

This is a free version of FortiClient software with limited feature support. Please upgrade to the licensed version for advanced features and technical support.

OK

I ACCEPT

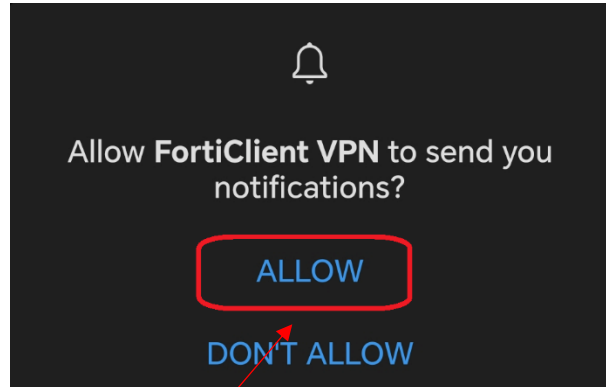

3. In the pop-up box that appears, select OK. 4. Select I Accept.

FortiClient VPN

Please grant permissions for FortiClient VPN to:
- Show notifications

OK

5. Select OK.

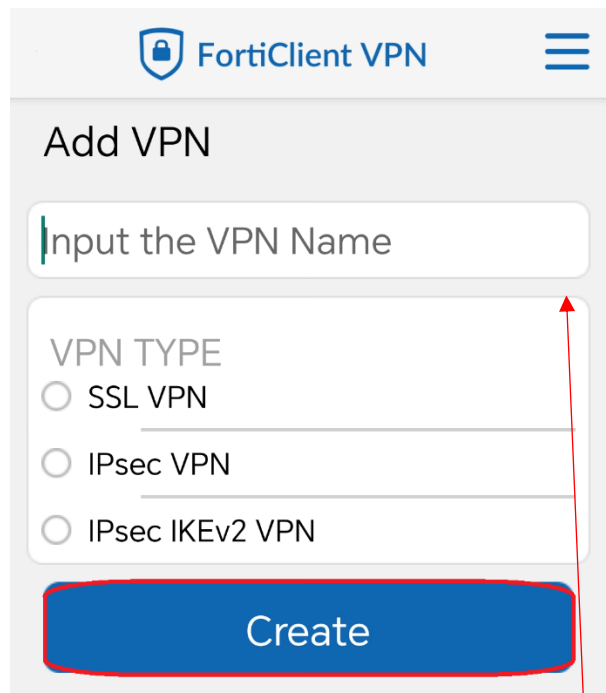

6. Select Allow.

Enable "Unrestricted Battery Usage"

Please enable unrestricted battery usage in the App Settings. Not enabling battery optimization can cause certain features of FortiClient to act unexpectedly.

CANCEL **ENABLE**

7. Click on Enable.

8. Where it says Add VPN, enter University of Strathclyde.

Select IPsec VPN.

Select Create.
