CONNECTING YOUR WINDOWS PHONE DEVICE TO WI-FI FOR THE FIRST TIME

These instructions are for connecting your Windows phone to the eduroam Wi-Fi for the first time. Once you configure your device to connect to eduroam, you will connect automatically afterwards. By configuring your device, you will not only be able to ensure your Windows phone connects to eduroam here at Strathclyde, but this will ensure your device will be configured to connect to eduroam on any campus you travel to.

1. On the App list, tap Settings.

2. Tap WiFi

3. Tap Eduroam
4. Type in your DS Username followed by @strath.ac.uk e.g. pkb12345@strath.ac.uk and DS Password. Tap ‘OK’.

5. You will then see the following message. Tap ‘Show certificate details’ to view these details.

6. The University of Strathclyde certificate details will be displayed. Tap ‘Connect’. You will now be connected to the Eduroam Wi-Fi.
