

Accessing network printers on Windows

To add the printers successfully you must be connected to the eduroam network.

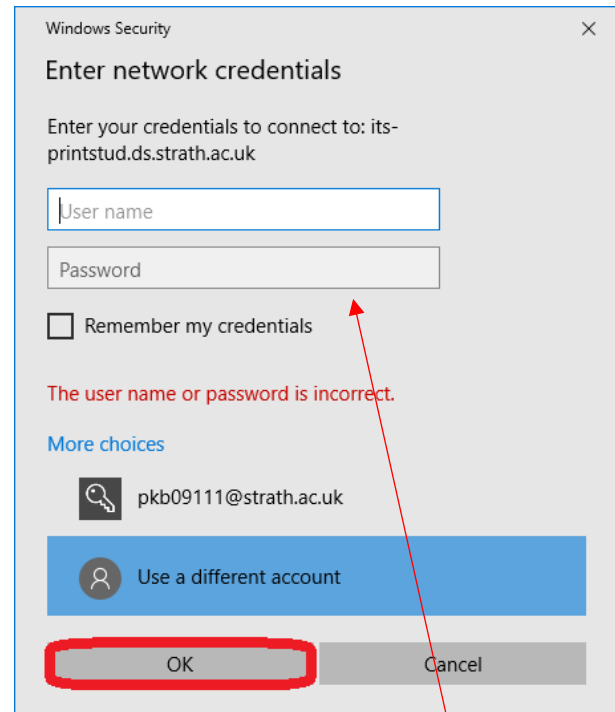

1. Click on the search icon on the toolbar, then enter [\\its-printstud.ds.strath.ac.uk](https://its-printstud.ds.strath.ac.uk). Hit Enter.

2. In the pop-up box that appears, click on More choices.

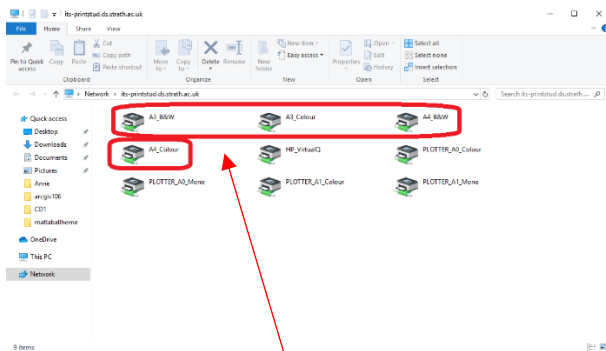

3. Click on Use a different account.

4. Where it says User name, enter ds\ followed by your username. For example, ds\pkb09111.

Where it says Password, enter your password.

Click on OK.

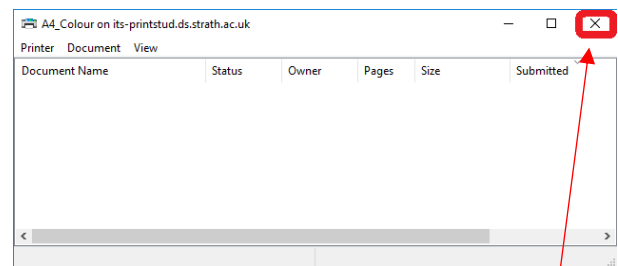

6. In the folder that appears, double-click on A3_B&W.

A pop-up window will open and load the print drivers.

Repeat this for A3_Colour, A4_B&W, and A4_Colour.

A3 and A4 allows you to print in either page size, and B&W and Colour allows you to print in black and white, and colour respectively.

7. Once the print driver windows have loaded for each driver, simply close them off.
