Login

You have been redirected here by another website, log in and you will be returned to the site.

Remember: to properly log out of any resource, you should always end your browser session.

Queries should be addressed to the IT Helpdesk.

Let's now create a Mathworks account, if you already have one you can skip ahead to the Sign In option. (If you are not offered the choice to create an account click the *Sign In* option and you can create one from that page.)

You must use your Strathclyde e-mail address not a personal one. Furthermore, the password you create here will be for accessing your new Mathworks account and so should be different from your University password.

You should get an e-mail from Mathworks asking you to verify your email address.

Verify Email Address

Need Help?

- **How do I install the toolboxes and blocksets that I just added to my license?**
Run the installer and follow the steps to download your license and new products.

Once the download is complete run the installer for you chosen operating system. You will likely be asked for the credentials of a user on your computer that has Administrative rights. Let's now walk through the installation process on a Windows 10 computer but it will be very similar to the procedure on a Mac or Linux machine.

Next you are offered a choice of toolboxes to install. You can install them all or just pick specific ones, the more you pick the longer the install will take and the more disk space on your local hard drive will be used up. You can add extra toolboxes after the install using the [Add-Ons](#) feature from within Matlab.
